***Cancer Cell International* is an open access, peer-reviewed, online journal that considers research on cancer cells, originating largely from work using cell culture techniques.**

*Cancer Cell International* has its main focus directed at work at the cellular level in cancer, or related studies that clearly implicate malignant transformation of cells. *In vivo* work is not discouraged per se, but articles must in general be focused on the cell rather than the organism with or without tumours.

*Cancer Cell International* is a publication of the International Federation for Cell Biology.

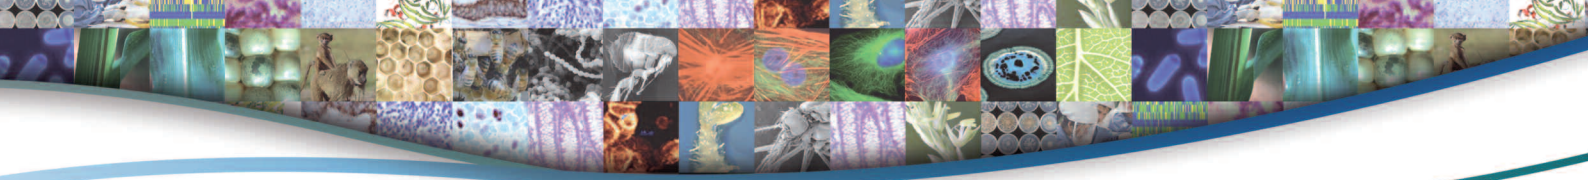

The journal considers the following article types: preliminary or short communications, primary research articles, reviews, minireviews and methodological manuscripts. For further details, see [www.cancerci.com/info/about/](http://www.cancerci.com/info/about/).

*Cancer Cell International* is supported in part by a grant from the Information Program New Opportunities Fund of the Open Society Institute.

### **Reasons for publishing in *Cancer Cell International*:**

- All articles published in the journal are open access; universally accessible online without charge.
- High visibility for your work - anyone with Internet access can read your article, free of charge.
- Included in PubMed - making your work easy to find, read and cite.
- Articles are published immediately upon acceptance.
- Authors retain the copyright of their articles.
- Electronic submission and peer-review makes the whole process of publishing your article simple and efficient.
- Publishing online means unlimited space for figures, extensive datasets and video footage.
- Professional formatting meets the standards expected by researchers.
